ENSURE SAFETY

360° VISIBILITY AND FLEXIBILITY

RESISTANT TO IMPACT AND
HARSH TEMPERATURE

The UltraFlex Flexible Delineator is a safety bollard designed to clearly define lanes, protect pedestrians, and absorb impacts by temporarily bending upon contact.

Its flexibility allows it to return to its original shape after multiple collisions. Made from a specially treated polymer, it withstands North American weather conditions and vehicle impacts. Its **UV-resistant coating ensures long-term durability and color retention**. High-visibility yellow diamond-grade reflective bands (ASTM D4956 compliant) provide excellent nighttime visibility.

Lightweight yet tough, the UltraFlex is ideal for narrow and urban environments, enhancing safety for all road users.
